

2019 Anne and Max Tanenbaum Symposium: Exploring extraterrestrial life, alpine ice patch archeology and systems biology

Thursday, November 7, 2019 | 9:00 AM – 12:45 PM

Bahen Centre Adel Sedra Auditorium (BA 1160) 40 St George St

Registration is free but required

RSVP by Friday, November 1, 2019 @ sylvie.besnard@utoronto.ca

Dr. Haley Sapers

“Intraterrestrial to Extraterrestrial: assessing microbial community structure and biomass visualization in the deep subsurface on our way to Mars”

Post-Doctoral Scholar, University of Southern California Institute of Technology/NASA Jet Propulsion Laboratory

Dr. Jack Mustard

“Current and Future Investigations for Signs of Life on Mars”

Professor, Geological and Environmental Studies, Brown University

Christian Thomas

“Alpine Ice Patch Archaeology: Preserving the legacy of a 10,000-year long relationship between animals, ice, and First Nations people in the mountains of the Yukon”

Senior Projects Archeologist, Department of Tourism and Culture, Heritage Resources Unit, Yukon Government

Dr. Marc Vidal

“From 20th century Genetics to 21st century Edgetics: Why complex networks operating inside cells matter much more than DNA sequences”

Professor, Genetics, Dana-Farber Cancer Institute, Harvard Medical School

Welcome remarks by Dr. Richard Hegele | Hosted by Dr. Charlie Boone
