

# NEUROSCIENCES & MENTAL HEALTH MINI-SYMPOSIA SERIES

Friday December 8th 2017  
Peter Gilgan Centre for Research and Learning  
Robert Salter Auditorium (2nd floor)  
686 Bay Street

## *Stem cell approaches for pediatric nervous system disorders*

8:45am - 8:55 am	Coffee and Registration
8:55am - 9:05 am	Welcome by Dr Freda Miller
9:00am – 9:50 am	<i>Effects of Environment on Perinatal Brain Injury and Recovery</i>  <b>Vittorio Gallo, Ph.D.</b> , Chief Research Officer; Director, Center for Neuroscience Research; Director, Intellectual and Developmental Disabilities Research Center- Children’s National
9:50 am – 10:30 am	<i>Harnessing endogenous stem cells for brain repair in children with neurological disorders</i>  <b>Donald Mabbott, Ph.D.</b> , Senior Scientist, Neurosciences & Mental Health; Associate Chief, Academic and Professional Practice -The Hospital for Sick Children; Associate Professor, Psychology - The University of Toronto
10:30am - 11:00am	<b>BREAK</b>
11:00am-11:40am	<i>Learning about brain repair by studying mammalian neural stem cell development</i>  <b>Freda Miller, Ph.D.</b> , Senior Scientist, Neurosciences & Mental Health, The Hospital for Sick Children; Professor, Department of Molecular Genetics- University of Toronto
11:40am -12:30pm	<i>Stem cell-based treatment and modeling of glial disease</i>  <b>Steven Goldman, M.D., Ph.D.</b> , URM Distinguished Professor of Neuroscience and Neurology; Chief, Division of Cell and Gene Therapy; Co-Director of Rochester's Center for Translational Neuromedicine - University of Rochester Medical Centre.
